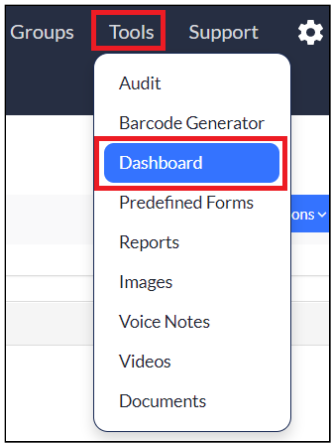
Dashboards

The dashboard feature here at Asset Panda allows for you to get in touch with your creative side. We say this because this is your area to set up in whatever way suits you best, a place where you set up charts that reflect your data on an individual basis.

Let's now delve into dashboards.

1. Click **Tools**, and then select **Dashboard**.



You are presented with a blank dashboard that's now waiting for you to customize it.

2. See any of our Related Topics (shown below) to learn more about dashboard customization.
